S. W. Call, Perry, Ohio

THIS IS MY TRAVELING SALESMAN.

A Word with my Customers.

I N again sending out my Annual Price List, I wish to remind my customers that prices herein given are for First-class Stock, the very best that can be grown. If you are looking for cheap stock regardless of quality, do not send your orders here, but if you wish to get the best quality of trees in good condition, and at reasonable prices, I shall be pleased to receive your orders, and I *guarantee satisfaction*. I make a specialty of giving my customers the best that can be grown, and have built up a large and constantly increasing trade by so doing, believing, as I do, that in buying fruit trees, "the best are the cheapest." My advice to all fruit growers is, never buy a poor tree because someone offers to pay the freight.

To those unacquainted with my nurseries, I wish to say, I make a specialty of *dealing direct with the farmers and planters*. I employ no agents, and send out no traveling salesmen, except this Price List. My trees are all grown here on my premises, under my personal supervision, and no healthier, hardier, thriftier or better stock can be grown. (See certificate of inspection on page 23). Anyone sending us their order can depend on having it filled with the finest selected stock, packed in the best possible manner, and given as much care as could be given it were they here to attend to it themselves.

 Note what my customers have to say on pages 21 and 22.

The expense of packing a small order is nearly as much as large ones, hence I cannot accept an order of less than \$3.00.

Please remember I guarantee satisfaction.

Prices herein given are for stock well boxed and delivered to the Railroad or Express Company at this place.

EARLY ORDERS.

Please send in your orders early.

Parties ordering largely need not send all of the money with the early orders. If you prefer, you can send enough to secure the order, and the balance any time before the shipment.

Parties not familiar with all the new varieties of fruit who wish my assistance in making their selection of varieties can send the number of early and late varieties, sweet or sour, which they wish, and I will give all such orders my personal attention and furnish the very best varieties grown. In such case if you have a plenty of some varieties at home just state what you have on hand and I will give you a fine assortment of other varieties.

CLUBBING RATES.

Any person ordering Twenty Dollars or more worth of stock may select all stock at 100 rates, regardless of the number taken. If the order is for more than one person, by giving the stock wanted for each one, we will so pack them that each can have his order separate, although all are shipped in one box.

If you need less than Twenty Dollars worth of trees for your own setting, get some of your neighbors to join with you and thus get your stock at the lowest rates.

In Ordering Goods please observe these Terms :

Terms, CASH.

All articles will be labeled true to name; not a single plant shall, intentionally, be otherwise sent out. And while we exercise the greatest care, and give our personal attention to cutting buds and securing our stock from bearing trees, and from the most reliable growers—should any mistake occur, and any trees prove not true to name, we will furnish trees to replace such free of charge, or will refund the money paid for any such trees that may not prove true to name, but will not in any case be held liable for any damage greater than the amount originally paid for such trees.

When money is forwarded with the order the goods are at once secured and unpleasant delays are avoided.

In ordering goods C. O. D., ONE-FOURTH the amount of the bill must accompany the order. And parties ordering C. O. D. must pay express charges for return of money.

First orders will, as far as possible and practicable, be served first.

The articles will be furnished at the prices named; however, 50 will be furnished at the 100 rates.

We usually commence shipping in the Spring, about the first of April, and in the Fall, about October 15th.

My Eighty-page Descriptive Catalogue will be mailed to any address for 10 cents. Anyone sending us an order for stock can have the Descriptive Catalogue mailed to them Free of Charge, by requesting it.

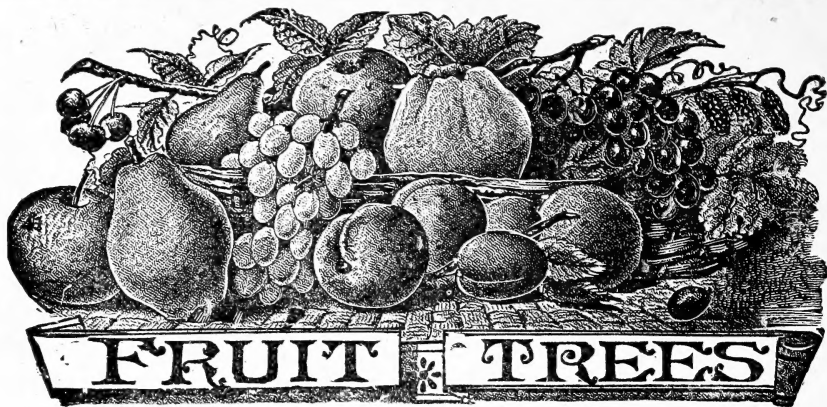

Should you receive more than one copy of this Price List, please hand it to some friend who is interested in fruit culture.

If you have a friend that you think would like one of our Price Lists, send us their address and we will send them one by return mail.

We often receive letters of inquiry in regard to the cost of Freight on Trees, etc. To all such we wish to say, on orders of 100 or more trees it is usually about $\frac{1}{2}$ cent per tree, and never as high as two cents per tree. Address all orders to

S. W. CALL, Perry, Ohio.

**APPLE TREES.**

	Each	Per 10	Per 100
First-class, 2 to 3 years, 5 to 7 feet high.....	\$ 30	\$3 00	\$30 00

THE ARCTIC

Has produced a full crop of large yellow Free Stone Peaches every year since its origin, while some five of those years all other varieties of Peaches have failed in the same section. If you wish Peaches every year, set the Arctic, it is not only the hardiest of all Peaches, but it is the **BEST** of all Hardy Peaches. ❀ ❀ ❀

THE ARCTIC.

The Hardest Peach Grown.—Bears full crops where all others fail.

It is a large yellow freestone of the finest quality, ripening October 1st. Very prolific and should be thinned in order to secure extra size.

First-class, Arctic, 4 to 5 feet, 1 year.....
Medium Size, 3 to 4 feet, 1 year

Rocky Mt. Imp. Dwarf, 2 to 3 ft. Only worth cultivating as an ornament.

40	3 50	30 00
----	------	-------

THE BRASSINGTON CHERRY.

This new Seedling Cherry leads all other Sour Cherries in size, quality and productiveness. Earlier than the Early Richmond, as large as the Montmorency, Dark Red, sprightly subacid, of the best quality and the most productive Cherry grown. It originated in Oceana County, Mich. The trees are very thrifty, upright growers, making a fine tree for setting along the roadside.

PERFECTION CURRENT.

The Perfection Currant is a cross of the Fay and White Grape and combines the good qualities of both. Color, bright red, quality the best. It has larger berries, larger clusters and is more prolific than any other currant now offered to the public. It was awarded the "Barry Medal" by the Western New York Horticultural Society, and First Prize at the Pan American, and was the only currant to receive the Gold Medal at St. Louis. No garden is complete without the Perfection. Good strong plants, 15 cents each, \$1.50 per doz.

STRAWBERRIES.

(All strawberry plants should be shipped by express.)

Marshall, Greenville, Bubach, Jessie, Glen Mary, Wm. Belt,

CLEMATIS.

A beautiful class of hardy climbers, many of the varieties with flowers five to seven inches in diameter. Excellent for pillars or trellises, or when used for bedding or running over rock work or an old tree or stump they make an excellent show. They delight in rich soil, a sunny situation and are perfectly hardy. **Duchess of Edinburg.** A free flowering double white variety, with medium-sized flowers.....

Henryi. Creamy white, large and fine, very hardy and strong grower.....

Jackmanii. The flowers when fully expanded are from four to six inches in diameter, intense violet purple, with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts. The strongest grower and best bloomer in the collection.....

Mad. Van Houtte. Pure white, extra fine.....

Ramona. A strong, rampant grower, and very hardy. A free and perpetual bloomer; flowers very large; color a deep rich lavender; very showy.....

Coccinea. (The Scarlet Clematis.) The flowers are bell-shaped; in color a rich, deep, coral scarlet, shining as if polished, and lasting a long time when cut

Paniculata. See cut on page 10. Rapid grower; free bloomer. A profusion of small white sweet scented flowers; very desirable.....

ROSES.

CLIMBERS—Strong, healthy, out-door grown, dormant plants, 20c. each; 6 for \$1.00.

Baltimore Belle—Nearly white; one of the best white climbers.

Queen of the Prairie—Bright rose red; fine grower.

Seven Sisters—Crimson, changing to white.

Dorothy Perkins—One of the finest climbing Roses. Large size. Shell Pink.

Tennessee Belle—Bright rose blush.

RAMBLERS.

Crimson Rambler—Crimson scarlet. One of the finest new climbing roses, 20c. each.

Yellow Rambler, Aglaia—The finest yellow climbing rose, 25c.

White Rambler—Pearly white, free grower and remains in blossom for a long time, 25c. each.

Baby Rambler—A dwarf bush. Blooms in clusters continually all summer. Very desirable for bedding. 25c. each.

One of each of the 4 Ramblers for 75c.

TEA ROSES—Everblooming.

Strong, healthy plants. 20c. each. 6 for \$1.00.

Perle des Jardins—This magnificent Rose still retains its position as the finest Rose of its color ever introduced, and grows into perfect favor year after year. The color varies from canary to golden yellow; flowers large and beautifully formed.

Catharine Mermet—One of the finest Roses grown. The buds are very large and globular, the petals being recurved and showing to advantage the bright pink of the center, shading into light creamy pink. A strong grower and fine bloomer.

Papa Gontier—A magnificent red Tea. It is a strong grower, with fine healthy foliage; the buds are large and long, with thick, broad petals of a dark carmine crimson color, changing to a lighter shade in the open flower. An excellent winter bloom ing variety, and one of the best for outdoor planting, opening up its flowers in beautiful shape.

The Bride—This is decidedly the most beautiful white Tea rose, and more of them are grown for cut flowers than all other White Roses combined. The flowers are very large and double, on long, stiff stems, of fine texture and substance, and last a long time in a fresh state after being cut.

Marechal Neil—Beautiful deep yellow, very large, full, globular form; sweet-scented, free flowering; one of the finest yellow Tea-scented Roses yet introduced.

HARDY ROSES.

These Hardy Roses should be planted in deep rich soil, and cultivated often, or if set where they cannot be cultivated, the ground should be loosened up with a hoe, often, and mulched with fine well-rotted manure. Trim them well in early spring, and they will repay you for all the extra care you give them. If properly cared for you should have flowers during the entire season from June to November.

FRAU KARL DRUSCHKI.

The finest White Rose grown, perfectly hardy, a rank grower and free bloomer. The blossoms are large, snow white, very double, and a great favorite with all who have seen it. 25c. each.

HYBRID PERPETUAL.

These are not the tender, hot-house plants that are sold so low, but are all strong, hardy, out-door Roses. 25c. each; 6 for \$1.00.

Paul Neyron—Flowers very large, rose color; a strong grower and free bloomer.

Gen. Washington—Scarlet-crimson; one of the best.

Gen. Jacquemont—Brilliant crimson; one of the finest scarlet Roses.

Jules Margottin—Deep brilliant rose; fine.

Mrs. J. H. Laing—Soft, delicate pink; one of the best.

American Beauty—Flowers large and very double; color a rich deep rose.

Coquette des Alps—One of the finest, pure white; flowers large and a profuse bloomer.

Marshall P. Wilder—Bright, cherry carmine; free bloomer.

Madam Plantier—Pure white.

Margaret Dickson—This we consider one of the finest White Roses, perfectly hardy and very fragrant.

MOSS ROSES.

Strong, healthy plants. 25c. each; 5 for \$1.00.

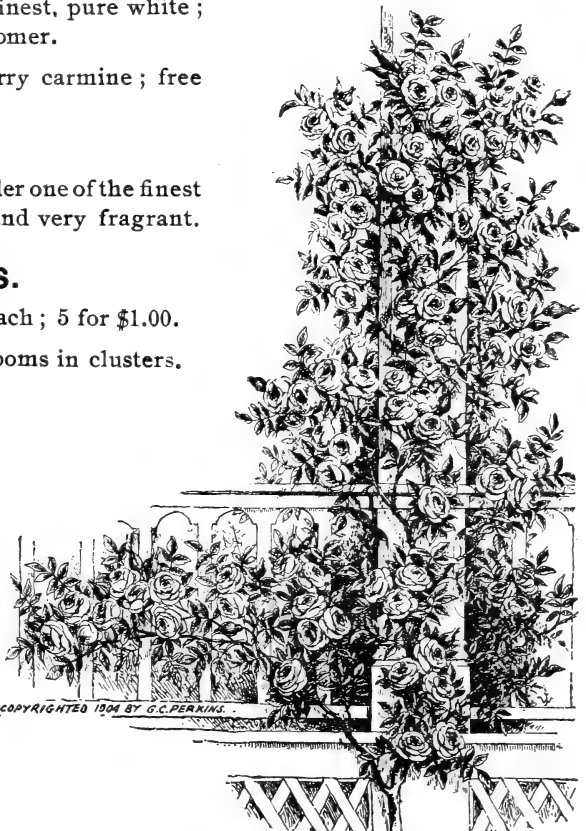

Perpetual White—Pure white; blooms in clusters.

Luxemburg—Brilliant red.

Crested—The finest of all for buds.

SPECIAL OFFER No. 10.

For the sake of encouraging my customers in setting Roses, I will furnish 10 H. P. Roses, *strong healthy plants*, of five different varieties, my selection of varieties, for \$1.50. This is a rare chance to get first class Roses at half-price.

BALTIMORE BELLE.

NUMBER OF TREES ON AN ACRE.

30 feet apart each way.....	50	10 feet apart each way.....	435
25 " " "	70	8 " " "	680
20 " " "	110	6 " " "	1210
18 " " "	135	5 " " "	1742
15 " " "	194	4 " " "	2723
12 " " "	300	3 " " "	4840

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which, divided into the number of feet in an acre (43,560), will give the number of trees to the acre.

DISTANCES FOR PLANTING.

Standard Apples.....	30 feet apart each way.
Standard Pears and strong growing Cherries	20 " " "
Duke and Morello Cherries.....	18 " " "
Standard, Plums, Apricots, Peaches, Nectarines.....	18 to 20 " " "
Dwarf Pears.....	10 to 12 " " "
Grapes.....	rows 9 to 10 feet apart, 7 to 10 feet in rows.
Currants and Gooseberries.....	3 to 4 feet apart.
Raspberries and Blackberries	3 to 4 by 5 to 7 feet apart.
Strawberries for field culture.....	1 to 1½ by 3½ to 4½ feet apart.
Strawberries for garden culture.....	1 to 2 feet apart.

NOTE.—A most excellent way in planting an apple orchard 30 feet apart is to plant peaches in between. By the time the apples require the ground the peaches will have passed their prime and can be removed.

SEED CORN.

I have a fine stock of the best seed corn that I have ever grown, and send out none but corn shelled from the best selected ears. Will advise my customers to order early as I have never yet been able to supply the late orders for seed corn.

IMPROVED LEAMING.

The Improved Leaming is rapidly forcing its way to the front and becoming a great favorite with our best corn growers. It is Medium Early—Large, Long Ears, and Long Kernels of Golden Yellow Corn—one of the very best.

MORTGAGE LIFTER.

This justly celebrated Field Corn needs no recommend from me. The ears are of perfect shape, kernels long, with from 16 to 25 rows of golden yellow grains, well filled out to the end of the cob.

The Mortgage Lifter is my favorite and yields more bushels to the acre than any other that I have ever seen.

It is a rank grower, often bearing two large ears to the stalk.

10 lbs. of Shelled Corn	\$.60
25 lbs. of Shelled Corn	1.25
56 lbs. of Shelled Corn	2.50

SEED OATS. CANADA CLUSTER.

Why grow the common oats and get a yield of from 30 to 50 bushels per acre, when you can just as well grow The Canadian Cluster and get twice that amount. They are a white oat, of the best quality, and on good ground will produce from 75 to 100 bushels per acre. Order Early.

IRISH JUNIPER.

SPRUCE.

Get your neighbors to join with you, and if your orders exceed One Hundred Dollars, to be shipped to one address, I will pay all freight to any point east of the Mississippi River. Each order will be marked and billed up separately.

See Clubbing Rates on page 3.

LARGE FLOWERING FRENCH CANNAS.

I have a large collection. Among the most desirable are: Queen Charlotte, Madam Crozy, Austria, Florence Vaughan, Chas. Henderson, etc. Price, 10 cents each; \$1.00 per dozen.

CALADIUMS.

The Caladiums are among our finest plants for tropical effect.

Large Imported Bulbs, 25c each.

LILY OF THE VALLEY.

One of the most exquisitely delicate, highly perfumed, early spring flowers. Snow white and perfectly hardy. It will thrive in any soil. Large clump of flowering plants, 25c each.

PÆONIES.

Paeonies. (Herbaceous) These are among the finest hardy flowers. I have twelve different varieties of the finest imported stock—deep red, deep rose, rich crimson rose, buff center, dark purplish red, pink, cream center, flesh white, etc. 25c each. Extra large size 50c each.

TUBEROUS-ROOTED BEGONIAS.

Of all the beautiful flowers grown, these are my favorites. They bloom continually from May till November and furnish such a variety of the most beautiful flowers of gorgeous colors. They hold their perfect form and colors for a long time. The same blossom often lasting for ten days in perfect condition. The bulbs should be started in pots in the house in March or the fore part of April and as soon as all danger from frost is past, transplant into a bed of good rich soil close to the north side of the house so the direct rays of the sun will not hit them. Fine imported bulbs of the double varieties, 15c each; \$1.25 per dozen; or if sent by mail, 2c each extra.

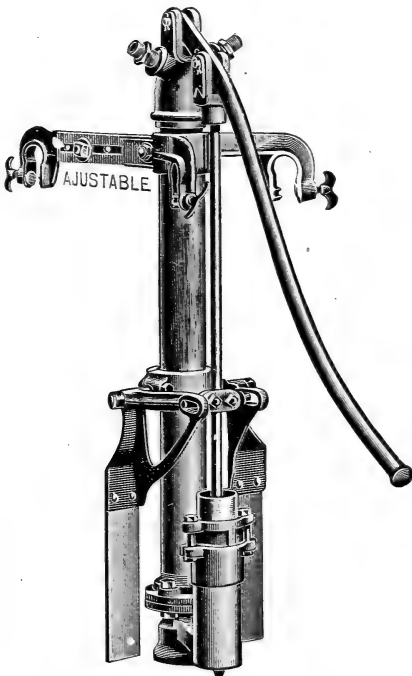

SAN JOSE SCALE.

I often receive letters of inquiry in regard to the treatment of San Jose Scale. I know of no better method for the Fruit Grower than spraying with Scaleside, or Sulphur—Lime solution. Either of these if properly prepared will kill all of the Scale that are wet with the solution. Of the two, I prefer the Scaleside as it is much more pleasant to use, spreads more readily, and is fully as effective in killing the scale. I would advise spraying all fruit trees early in the Spring before the trees have leafed out, and again in the fall after the leaves have fallen.

Before spraying trees, shrubs, plants or vines infested with this insect, all useless wood should be removed, and the bodies and large limbs should be scraped, so as to remove all loose bark. It is essential that the treatment be thorough and that every part be covered with the spray.

Can furnish my customers Scaleside in any quantity, and always at bottom prices. Price list for the asking.

SPRAY PUMPS.

I have made arrangements with one of the largest manufacturers of Spray Pumps and can now furnish my customers with the best Spray Pumps manufactured, of any size, at very reasonable prices. These Pumps will be shipped direct from the factory. They are made of the best material and fully warranted. I will be pleased to send Spray Pump catalog to anyone requesting one.

If you will kindly state what special work you wish the Spray Pump for, I will be pleased to give you the advantage of my experience, stating which pump I think will be best for your use, and naming the lowest price on the same. Will also send to any one wishing them, formula for the different kinds of spraying solutions, as well as the best time to spray.

Be sure and order your Spray Pumps early so that you will be all ready to spray when the time comes for that work.

A large number of our best fruit growers claim that the scale has proved an advantage to them, by spraying to kill the scale; they at the same time improve the quality of their fruit, increase the yield and prevent the Leaf Curl.

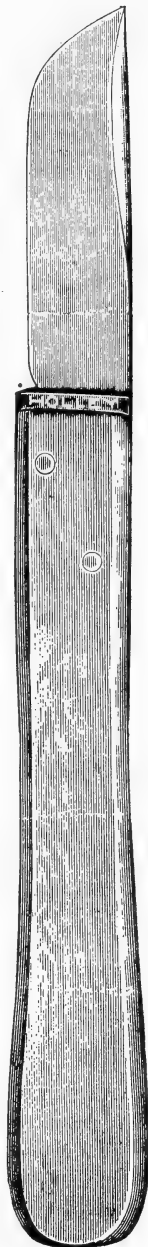

LIME SULPHUR SOLUTION.

To 15 pounds of well slacked fresh Lime, add 15 pounds of Flour of Sulphur; first stir water enough into the sulphur to form a thick paste, and add to the lime while slacking, with water enough so it will stir easily, boil this for 45 minutes or longer. Then add water enough to make 50 gallons, strain well, strain through a coarse, and then a fine strainer, and use while fresh. This will kill every scale that it wet with the solution.

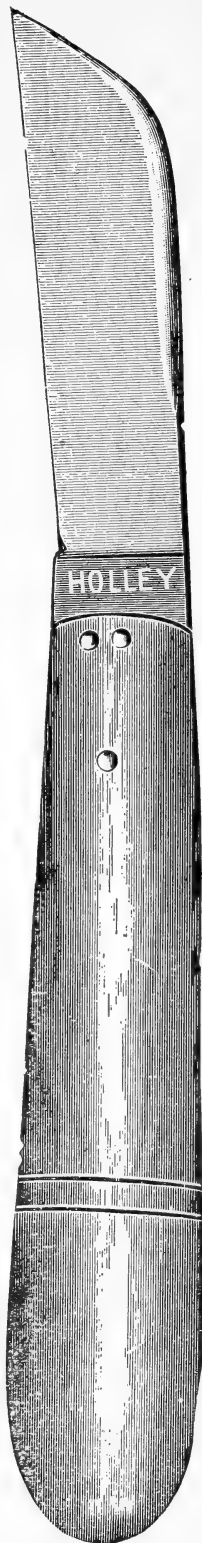

It corrodes brass and copper, and if a pump with brass fittings is used, care should be taken to run clear water through it after each day's spraying. Never boil the solution in a copper kettle.

PRUNING SHEARS AND KNIVES.

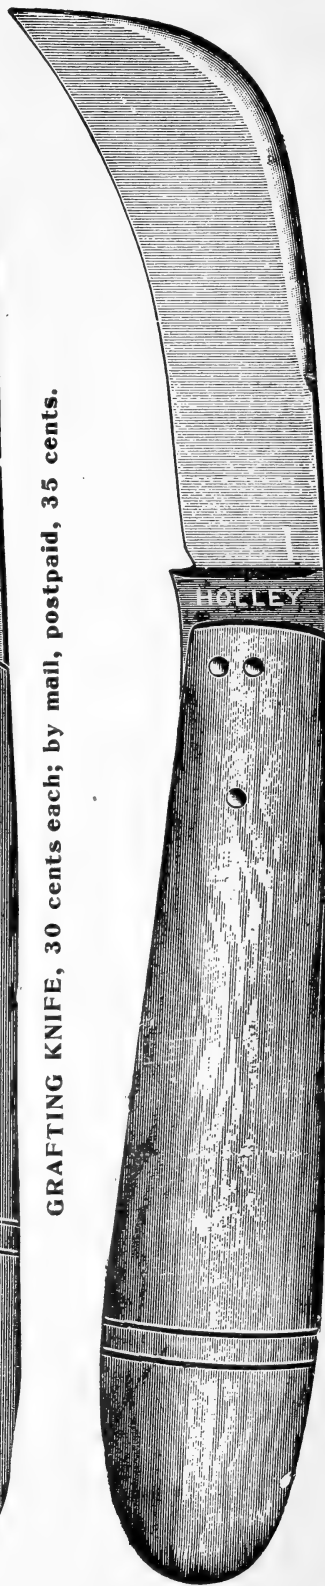

Very many of my customers have no doubt had trouble in buying Pruning Shears and Knives that were of good quality at reasonable prices. They are either too hard or too soft, are poorly made and dear at any price. I am having manufactured expressly for my use and customers, Pruning Shears and Knives that are made of the **BEST QUALITY OF STEEL** and tempered expressly for trimming, and have put the price on them very low, considering quality of goods, as there is nothing better manufactured.

BUDDING KNIFE, 25 cents each; by mail, post-paid, 30 cents.

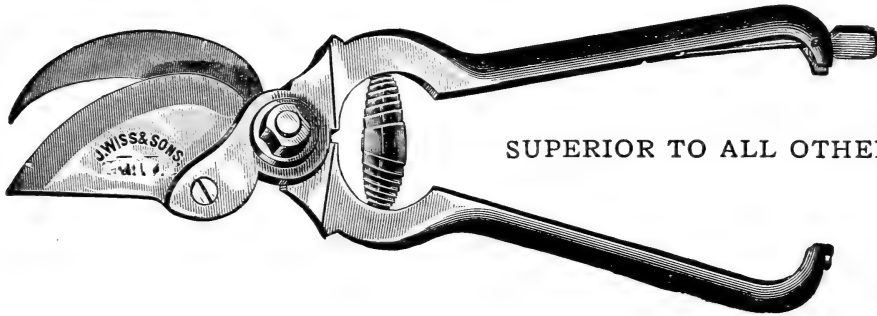

GRAFTING KNIFE, 30 cents each; by mail, post-paid, 35 cents.

PRUNING KNIFE, 35 cents each; by mail, post-paid, 40 cents.
All three of the above knives by mail, post-paid, 90 cts.

SOLID STEEL PRUNING SHEARS.

SUPERIOR TO ALL OTHERS.

These Pruning Shears are forged entirely of steel. All the parts are milled and interchangeable. The blade, which is of the best cutlery steel, is fitted to the handle in a unique manner, securing perfect rigidity and ease of replacement in case of wear or breakage.

Price, By Mail, Post Paid, \$2.25 Each.

Price when shipped with other goods, \$2.00 each.

Extra Blades, 50c each. Extra Springs, 10c each.

These Shears are fully warranted. There is nothing better made.

CARE OF TREES AND PLANTS

After they are received.

While we realize fully that nearly all of the fruit growers of today understand the setting and handling of nursery stock, still for the benefit of the few who are not accustomed to transplanting trees and plants, we make the following suggestions:

Preparation for Planting.

Always have the ground in fine condition by deep plowing and thoroughly pulverizing. This can be done on ground only that is well drained. A little extra labor in getting the soil well and deeply pulverized will add much to the growth of the trees the first season.

If the trees are to be set in a lawn or where the ground cannot be plowed, then spade the ground up well and deep, for at least three feet in diameter and eighteen inches deep.

Care of Trees before Planting.

As soon as trees are received from the nursery they should be examined and cared for at once. Do not delay. If the quantity is so large, or for any other reason they cannot be set at once, they should then be opened out and separated, and heeled in the ground, so that the moist fine soil will come in contact with and thoroughly cover all of the roots. Pack the soil about them so as to exclude all air from the roots. It is better to heel them in on or near the ground where they are to be set, so that a few only can be taken out at a time and set without being long exposed to the air.

Directions for Planting.

Dig the holes large enough to admit all of the roots in their natural position, without bending or cramping them. Do not dig the holes till you are about ready to set the trees, as the soil soon dries out and is not as fresh as if just dug out. If dug larger and deeper than the size of the tree requires, and then partly filled again with good soil from the top of the ground, it will be all the better for the extra labor.

Before setting the tree cut off all broken or bruised roots with a sharp knife, and all roots that have been cut with the spade in digging should be cut again, sloping from the under side. If this cut is made smooth with a sharp knife it is much better than if done poorly or left without smoothing at all. A smooth fresh-cut root set in moist, fine soil commences to heal over and throws out fine fibrous roots at once, which act as feeders for the tree, while if the roots are left in a broken, bruised or mangled condition, they remain dormant and in about the same condition during the season, making but very little if any growth.

Now let some one hold the tree in position while you fill the hole with fine moist, rich soil. Care should be taken to keep each and every root in its natural position, filling under the roots with the hands, and when well filled press all down firm with the foot. Set the tree the same depth that it grew in the nursery, or but very little deeper. After the earth has been well pressed down with the feet throw a little fine loose soil on top, and leave without packing, as it will help to hold the moisture better than if the top is left hard.

Mulching.

No person who sets a tree can afford to leave it without mulching, either with coarse or fine barnyard manure, sawdust, grass, weeds, straw or something to help shade the ground. Barnyard manure is much the best. Cover the ground around the tree. It will not only help to shade the ground and keep it from drying up, but will enrich the soil and add much to the growth of the tree.

Selecting of Varieties.

Any person, not acquainted with the different varieties of fruit, who wishes to leave the selection to me, can write their order stating the number of trees wanted of each kind and I will give such orders my personal attention, selecting not only the best varieties, but those that are best adapted to their section.

Location of Nurseries.

My nurseries are located near the shores of Lake Erie, about thirty miles east of Cleveland, on the Lake Shore & Michigan Southern Ry. and the N. Y. C. & St. L. Ry. Our location is especially adapted to growing healthy, hardy, thrifty trees. We have no trouble from Peach Yellows, or disease of any kind. If you wish the best that can be grown, I am prepared to furnish them. Please order early.

Aphis.

Some of our fruit growers are having trouble with a green louse or Aphis that cover the new growth of apples, pears, plums and roses and suck the sap until the twig dies and the tree has the appearance of having blighted. These Aphis are green on apples, pears and plums, and black on cherries. The green Aphis are especially fond of rose bushes. If taken in time they are easily killed by spraying with Rose Leaf Extract of Tobacco, Whale Oil Soap and Water in the following proportions: 1 gallon Rose Leaf Extract of Tobacco, 10 pounds of Whale Oil Soap, and 75 gallons of water. Mix thoroughly and spray thoroughly. If you have no Sprayer, you can dip the twigs and limbs that are covered with Aphis in the solution.

TREE PROTECTORS.

How to best protect our young trees from being girdled by the mice and rabbits during the winter is a question that comes to us at least twice a year—in the fall as we are looking for some protection and again in the spring as we find that many of our trees have been ruined by the mice and rabbits during the winter.

I am using with great success a tree protector, made of wood, cut like veneer 23 inches long, 8 inches wide and 23 to the inch in thickness. Wind them around the tree and shove them down close to the ground—tie a string around to hold them, and they make a perfect protection.

Can furnish them to any of my customers for 80 cents per 100 on car at this place. Would advise ordering early so they can be shipped by freight.

WHAT MY CUSTOMERS SAY.

I regret that I have only room for a few of the many hundred letters that I am receiving from my customers. But these few will give you a correct idea of the stock that I send out.

Jefferson Co., O., April 17, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The nursery stock ordered from you came to hand in first class condition, and we are well pleased with it. I have nineteen Arctic Peach trees that I bought of you that came in bearing five years ago, and they have never missed a crop yet. Yours truly,

GEO. A. ALLENSWORTH.

Hancock Co., O., May 26, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—We received the nursery stock ordered from you in good shape. We never received trees in as fine shape as they were in. They are all doing well

Yours with respect,

J. W. AGIN.

Crawford Co., O., April 12, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees that I ordered of you came yesterday. I must say they are the best I ever bought. I am well pleased with them. The trees that I bought of you in 1902 and 1903 are doing nicely, I feel proud of them.

Yours truly,

C. E. BRINKMAN.

Coshocton, Co., O., April 12, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Trees received, they are the finest and thriftiest trees that I ever bought. Will certainly recommend your trees to all of my friends.

Yours respectfully,

P. F. BARTH.

Fairfield Co., O., April 16, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Received trees on the fourteenth in splendid shape, never bought nicer trees anywhere.

Yours very truly,

A. H. TRINMER.

Indiana Co., Pa., April 20, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Received the order of trees and berry bushes all O. K. Think they are fine, they came through in very good shape. Look as thrifty as though they had been dug up yesterday.

Very truly yours,

J. F. HOOD.

White Co., Ind., June 27, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—All of the trees and plants that I bought of you this spring are growing better than any plants that I have ever bought before.

Yours truly,

ALEXANDER PEARCEY.

Seneca Co., O., February 15, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees that I got from you last Spring were fine, all but one have made a nice growth last season, 94 Peaches, 6 Apples, 4 Pears and 1 Plum, and all growing but one. That is something that I am not used to.

Yours truly,

R. M. GEORGE, Jr.

Columbiana Co., O., April 6, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—I received the trees on the third. They were the nicest trees that I ever received from any nursery. Well rooted, nice and smooth. The others who sent with me are well pleased. Shall recommend your nursery to everybody. Thanks for your promptness.

Respectfully yours,

L. J. STOFFER.

Marion Co., O., April 29, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Peace to thee. Received the trees in good order, more in number, and better in quality than I expected. In God we trust.

Yours truly,

FRED YENNY.

Athens Co., O., April 28, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees and berries received several days since, in good condition. I am well pleased with them. They are the finest I ever saw.

I remain,
MRS. S. A. WILSON.

Knox Co., O., April 2, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees came all right, and they are the finest I ever received from any nursery. Many thanks for your liberal and square deal.

Yours truly,
G. B. SHERMAN.

Lenawee Co., Mich., July 1, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The nursery stock that I ordered of you this Spring, was received in fine shape, I was very much pleased with it. I have bought nursery stock nearly every Spring for the last fifteen years, and will say that yours came in the best shape of any I ever bought.

Yours truly, GEO. L. PORTER.

Dekalb Co., Ind., April 5, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Would say the nursery stock ordered of you was received in time all right, and in good order, and they are the nicest trees that I ever got from any nursery.

Respects as ever,
GEO. W. WALKER.

Cuyahoga Co., O., April 6, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Trees arrived in good season and in fine condition, I am well pleased with them. I have fruit trees growing on my farm that I purchased from five different nurseries, and will say that I like yours the best of any. The Pruning Shears are the finest I have ever seen.

Yours truly,
MARTIN BARRETT.

Columbiana Co., O., April 29, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The nursery stock that you sent me was received this day, and all in good order. The Apples, Pears, Cherries and Peaches were certainly a fine, healthy, thrifty looking lot of trees. I am well pleased with them.

Yours respectfully, BINGLEY RUSSELL.

Preble Co., O., April 12, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees that I ordered from you came yesterday. I am very well pleased with them, as they were packed in fine shape, and have the best roots and tops of any trees I have seen shipped to this place. They could not have come in better shape.

Yours truly, HEMRAY POTTER.

Lorain Co., O., May 1, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The plants arrived in fine shape, and as in every case before this when I have received trees or plants from you they were fine strong plants as could be produced anywhere. Many thanks for prompt attention. Can recommend you to all with pleasure.

Yours truly, S. DEVEREAU.

Trumbull Co., O., April 6, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—I received the fruit trees all in good condition. They are as nice a lot of trees as I ever saw.

Respectfully yours,
ASA B. YORK.

Knox Co., O., April 23, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees that I ordered from you arrived in good shape, and are nice healthy trees. Please book me as a pleased customer.

Yours truly, CHAS. G. COLWILL.

Hardin Co., O., March 27, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Nursery stock arrived in first class shape, the packing was far better than I have ever seen done from any nursery. No bruised or damaged trees. I will remember you.

Yours, M. K. SAVAGE.

Westmoreland Co., Pa., Dec. 11, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees arrived in good condition and I am very well pleased with them. I can cheerfully recommend you to others.

Respectfully, W. H. MYERS.

Stark County O., Feb. 8, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The peach trees which I purchased of you some years since, many of them bore fruit the second year from planting. The Lemon Free had quite a good many on the second year and all of them had some. I have 70 of your peaches in bearing and they are all fine.

Yours truly,
R. E. SNODES.

Jefferson Co., Ohio, April 8, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees arrived in fine shape. I am very much pleased with them; never received a finer lot of trees, and they are put up in the very best condition possible. Wishing you success, I am.

Very truly,
J. B. MAYES.

Wayne Co., Ind., Nov. 6, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—Trees arrived today. They were nicely packed and in good condition. They are just splendid.

Yours truly,
J. M. NUTTER.

Clinton Co., Ohio, Nov. 24, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees I ordered from you were received on the 17th. They are very fine trees. Everyone that has seen them say they are the finest trees they ever saw.

Respectfully, E. A. CARROLL.

Geauga Co., Ohio, May 1, 1909.

S. W. Call, Perry, Ohio.

Dear Sir—The trees bought of you arrived all right and must say I was more than pleased with them. I have set out a number of trees in my life but these were the nicest. I shall always speak in the highest terms of the treatment I received from you.

Very respectfully N. E. SHANOWER.

Auto-Sprayer No. 1
